Gas Golf Cars

ONLY clean fresh unleaded 87 octane gas must be used. Each gas cart has a fuel gauge & LOW oil pressure light. Caution if the LOW oil pressure light stays on continuously; please STOP using the cart & contact AGCR LLC. Caution if you see any oil or gas leaking around the engine area STOP using the cart & contact AGCR LLC. Each cart is provided with a half tank of gas. It is the customers responsibility to maintain proper fuel levels for operation.

Electric Golf Cars

Electric Carts charger needs to be kept out of the weather at all times. It is recommended that the charger be left at the residence while operating the cart. The Charger is "automatic" and will shut off automatically when the cart is fully charged. The charger plugs into the cart at the driver's side of the cart just below the operator and will only fit one way. The power cord end requires 110v service only with a recommended 20 amp circuit. It is your responsibility to ensure that receptacles with adequate power are available to charge the cart. If the breaker keeps tripping during the charger cycle, please locate another outlet to complete the charging cycle on the electric golf cart.

Electric Carts are equipped with a battery gauge indicating when the batteries are getting low. It is recommended the Cart is placed on charge anytime not in use or at a minimum charged every night regardless of the battery condition. This will ensure you get the most out of the cart for the duration of your rental. Keep in mind, electric carts cannot and are not designed to run continuously without charging the batteries. Run times will vary and will be shortened if the cart is driven in loose sand, hilly terrain, or when carrying multiple passengers.

Common Information

Key must be removed from the cart anytime it is left unattended. At no time should there be more than 2 passengers (Two-Seater w/ Cargo Bed – Ex. Hauler 250) 4 passengers (Four-Seater – Ex. TXT/RXV, Yamaha Drive) & 6 passengers (Six-Seater – Ex. Shuttle 6 / Limo) on the cart. Allowing more than the recommended passengers on the cart will result in suspension damage and repair costs will be charged against your deposit. Do not make turns at high speeds. Slow down to turn or make corners especially with carts that have altered suspensions “Mid-Rise Lift Kits” as they are prone to rollover at high speeds. It is our goal to provide customers with reliable golf carts by which we perform routine maintenance and battery discharge tests. This is to ensure you get the most use out of the cart with each charge. In the event, a problem does arise, we ask that you first check to ensure that all operating instructions are being followed and the charger has sufficient power and is connected properly. Do not for any reason attempt to perform maintenance or repairs on the cart. If you are unable to resolve the problem, contact AGCR LLC immediately and we will send out a mechanic as soon as possible. Should the problem result in the loss of use during the agreed-upon rental time, you will be refunded appropriately. Failure to notify us of a problem will result in no refund for that period of time we were not notified of the problem. In the event, we are requested to make a service call and it is determined that the problem is the result of improper operation of the cart or failure to properly connect the charging system a \$35.00 fee will be charged against your deposit. Upon completion of the rental, the cart should be washed off thoroughly. Do not use a pressure washer, a water hose will be sufficient.
